

PUBLIC NOTICE

(October 1, 2018)

PICKEREL LAKE & THREE MILE LAKE

Please be advised that all signage in regards to Blue-Green Algae has been removed from the Armour Township beaches upon notification from the North Bay Parry Sound Health Unit.

However, the North Bay Parry Sound Health Unit warns that the drinking advisory is still in effect for those who draw their drinking water directly from affected lakes or have a shore well.

Degraded algae cells release toxin and it's this toxin that is not visible. The drinking water advisory will be in place for the remainder of this year.
